

asyst:Related Meters

asyst:Related Meters, a subsystem to **asyst:Utility Billing**, easily supports the use of various related meters. Such meters are, compound meters on a single account, additive and subtractive meters across multiple accounts and other situations where the billed charge is based on some combination of the readings or consumptions from more than one meter.

- Supports meters associated in additive or subtractive relationships.
- Related meters can be from a single account or different accounts.
- Additive and Subtractive relationships can vary from 0 to 100%..
- Works great for meters that support multiple readings from one meter.
- Related Meters can be billed at different rates.
